February 22, 2023

Hi Trinton

I write to express my extreme delight and feedback how well you have handled the project with our mutual client.

The global situation in 2022 was a difficult year for supply and delivery delays were understandable, but you kept us all abreast of milestones in a very professional way.

Thanks for the successful commissioning of the robotic welding system. We are encouraged by the results to date and are expecting great productivity improvements across a range of over 20 products that will go through the robot.

I am also looking forward to installing a Cobot when our client has enough bandwidth to do so.

Please stay in touch and looking forward to doing our next project with you.

Thanks and regards
