

Since
2014

Manufacturing

Smarter. Faster. Built with Passion

Established in 2014, with roots since 1987, we bring decades of expertise across manufacturing sectors, both in Australia and overseas.

The best automation isn't simply bought:— it's co-created.

We work alongside your key people, combining their deep understanding of your product and processes with our automation expertise.

The result is a solution built around the unique DNA of your business, tailored precisely to your needs.

With ARS, your product knowledge meets our passion for delivering exceptional outcomes.

From concept to commissioning, we optimise processes and deliver results

ARS
AUTOMATION & ROBOTIC SERVICES

OUR CAPABILITIES

- Robotic Welding
- Manufacturing and Assembly
- Palletising
- Robotic Painting
- Pick, Pack and Place
- Machine Tending, Loading, Unloading
- Material Handling
- Automated Cutting

OUR EXPERTISE

ROBOTIC WELDING

Whether it's laser, spot, or arc welding, we combine decades of process knowledge with your specific requirements to deliver best-in-class results. Leveraging cutting-edge vision and tracking systems like ServoRobot, we provide adaptive solutions that automatically correct for deviations, ensuring maximum arc-on time and superior joint consistency.

MANUFACTURING ASSEMBLY

Turn complex manual tasks into streamlined automated workflows. By optimising your unique assembly sequence, we help you increase throughput and eliminate waste while maintaining the highest quality standards.

MACHINE TENDING

Maximise your spindle time and asset utilisation. We design custom loading and unloading solutions that integrate seamlessly with your existing production machinery, lowering costs and removing bottlenecks.

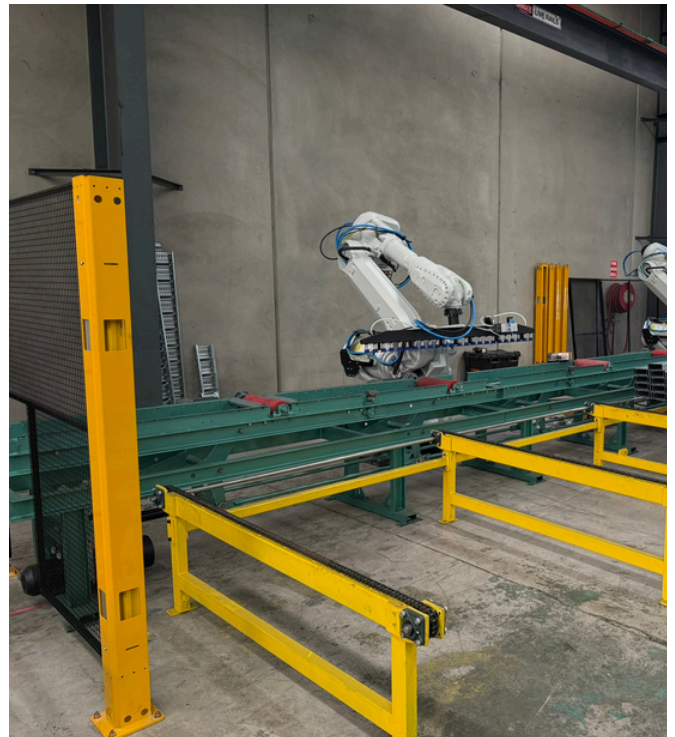

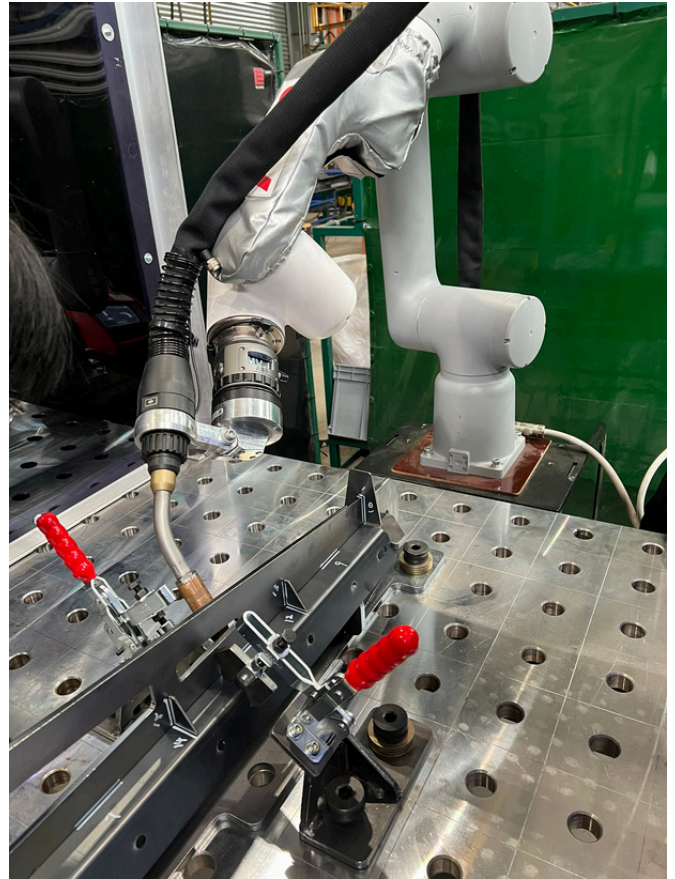

PALLETISING

High-speed precision for the end of your line. From heavy payloads to fragile goods, our proven robotic systems are tailored to your specific stacking patterns and production speeds, significantly improving site safety and efficiency.

...AND MORE

Our versatility is your advantage. From picking and packing to automated cutting and full-scale robotic painting and body shop equipment, we apply cross-industry experience to any specialised manufacturing challenge.
